CUSTODIAL LIGHT FIXTURES

OUR COMPANY

We are a Polish manufacturer of specialized, industrial lighting fixtures. We have been creating advanced and innovative solutions for over 12 years. We specialize in products dedicated to difficult working conditions and harsh environments.

We design, manufacture and sell lighting fixtures dedicated to various market sectors. Our offer is divided into five main divisions: explosion-proof light fittings and accessories, vandal-proof fixtures (for railway infrastructure), custodial fixtures for prisons and penitentiary establishments, heavy-duty light fixtures for industry and tunnel lighting.

We support our clients at each stage of selecting and designing lighting. In cooperation with customers we develop special solutions dedicated to specific projects and applications.

DESIGN AND DEVELOPMENT

ISO 9001

Prison lighting requires light fittings not only effective and efficient, but above all **extremely durable and safe**. It has to be **anti-ligature** and must **prevent any acts of self-harming**.

Our light fixtures are tested to determine the degree of impact resistance above IK11 (IK11+) made in an accredited testing laboratory, in accordance with applicable standards. **Additional laboratory tests showed their resistance to impacts with an energy of 150J.**

IK11+ 150J

We use only the highest quality materials from reputable european manufacturers. Thanks to strict quality control procedures, we can offer products that guarantee uninterrupted operation.

By focusing on development and continuous product improvement, we try to approach each project separately. The R&D department is working on the development of our offer based on the most modern solutions available on the market. **We prepare individual designs** of our luminaires tailored to the client's needs and in accordance with the current EU industry standards.

CUSTODIAL LIGHT FITTINGS FOR PENITENTIARY FACILITIES

The INP series is dedicated to penitentiary facilities, mental health institutions and hospitals. A special 'secure lock' screw system prevents unauthorized persons from entering the luminaire. Thanks to the compact design of the housing and the diffuser made of thick polycarbonate, a high degree of impact resistance is achieved IK11+ (150J).

NEW!

INP310LED-SF

Surface-mounted custodial light fitting with LED modules. Optionally it can be equipped with additional LED modules for night-time surveillance.

INP320LED

Corner-mounted custodial light fitting with LED modules. Optionally it can be equipped with additional LED modules for night-time surveillance.

INP320LED-RC

Recessed custodial light fitting with LED modules. Optionally it can be equipped with additional LED modules for night-time surveillance.

INP340LED

Surface-mounted or recessed custodial light fitting with LED modules. The luminaire is great to illuminate corridors and passageways.

INP360LED

Waterproof light fitting with LED modules. Thanks to the IP67 it is safe to use in shower rooms and toilets. Both housing and screws are corrosion-resistant.

INDIVIDUAL LIGHTING

INTERROGATION ROOMS

CORRIDORS

CAMERA PROTECTION

INDIVIDUAL AND SPECIAL APPLICATION PRODUCTS

Thanks to the robust construction, special shape, and secure screws, our lighting is anti-ligature. This means they are safe for users even in conditions that can trigger self-harming behaviors. It is crucial, especially for individual lighting equipped with switches and sockets. A special 'secure lock' screw system prevents unauthorized persons from opening the luminaire.

INP325LED

Compact and individual custodial light fitting equipped with socket as a standard and a switch as an option. The luminaire is great as a bedside lamp.

INP330LED

Surface-mounted custodial light fitting with LED modules. As a standard, the luminaire is equipped with a switch.

INP CB - CAMERA BOX

Corner-mounted custodial camera box with high impact resistance. The camera mounting can be adapted to specific camera model.

Itre Prison, Belgium

Racibórz Prison, Poland

ADDITIONAL SOLUTIONS

NIGHT LIGHT

Additional light source used to illuminate the cell at night. It allows inspection of the room without activating the entire luminaire. Night Light can work in continuous or on-demand mode.

Standard high performance LED modules

SWITCH AND SOCKET

Switch

Socket 230V

MOTION SENSOR

Motion sensor under the diffuser
